WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Temperatures will only gradually warm into the weekend as an upper level trough lingers over the Pacific Northwest. Expect some night and morning coastal low clouds and fog as well. Dry weather will last into next week with a gradual warming trend later next week as high pressure returns.

San Francisco Weather:

A slight warm up is expected for this afternoon under sunny skies with generally light northwesterly flow across the region. Onshore flow will increase Sunday and persist through Tuesday resulting in cooler daytime temperatures and the return of early morning coastal clouds.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Weak high pressure and northwest flow will bring a slight warm up this weekend. Daytime highs are forecast to come in a few degrees above normal. A low pressure system moving through the Pacific Northwest will bring slightly cooler temperatures Monday and Tuesday but any precipitation is expected to remain well north of the area. Wednesday and Thursday will see another warm up as high pressure slides across the west coast with daytime highs climbing to several degrees above normal. The passage of another system to the north may bring a slight cooling towards the end of next week.

Hanford Weather:

West wind aloft will allow for a continued slight cooling trend through the weekend into early next week along with dry conditions.

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

The long wave trough over the western United States will continue to bring overnight low clouds and fog and onshore breezes through early next week. Gradual cooling will begin Sunday and then a gradual warming trend is expected by midweek.

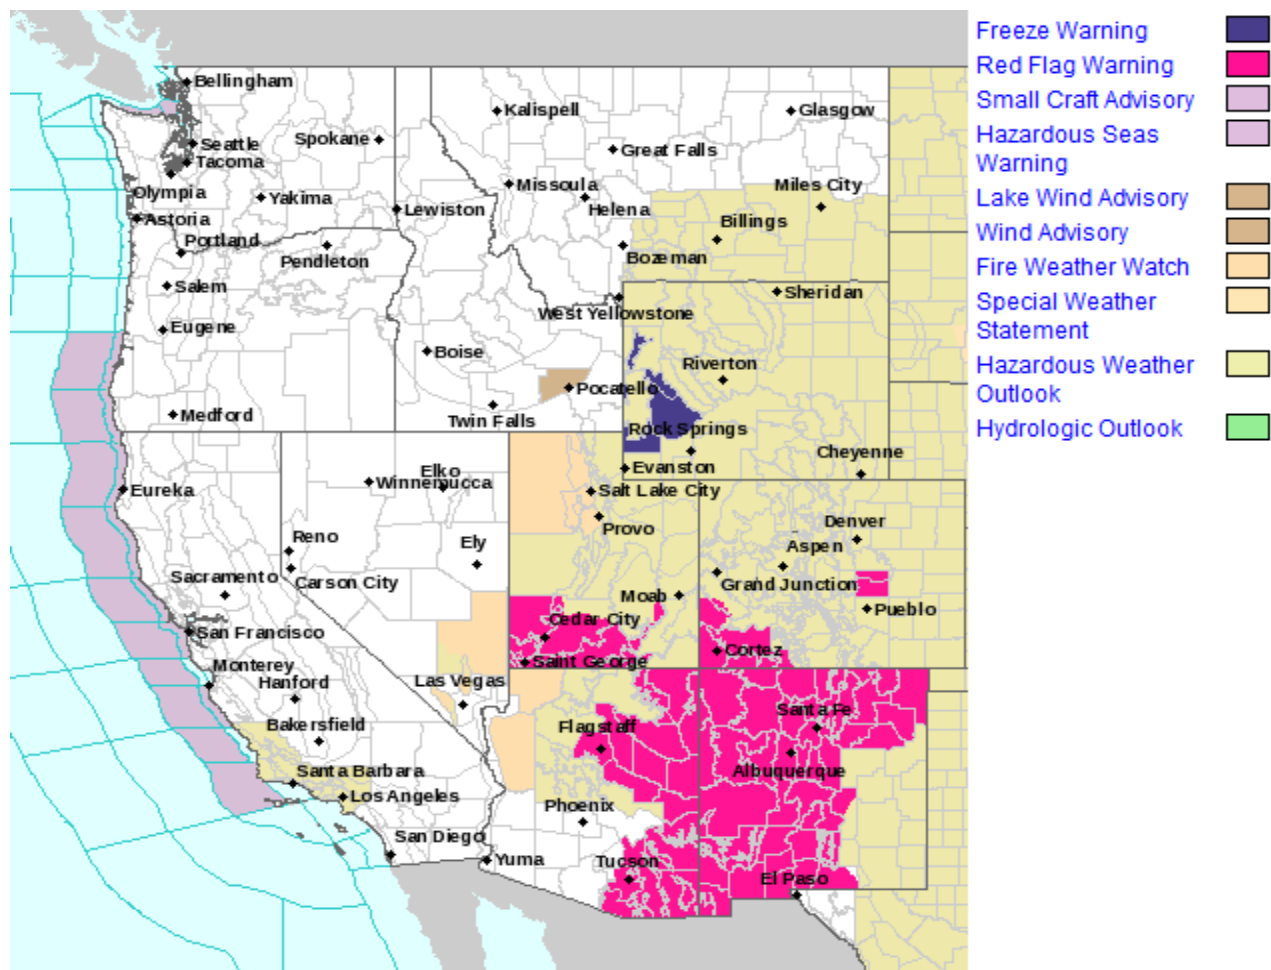

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Seasonal weather will continue through next week with night and morning low clouds will continue in the coastal areas and valleys. Onshore flow will continue gusty west winds in the mountains and deserts during the afternoons and evenings. High temperatures will cool slightly through Tuesday then return to near seasonal levels for the latter half of next week.

Southeast California Weather:

Northerly winds can be expected today behind a cold front with the strongest gusts up to 30 mph in the Colorado River valley this morning. Gusty southwest winds will return Sunday through Tuesday with the strongest gusts in the Barstow and Kingman areas. No operationally significant clouds are expected through Monday then a few thunderstorms may develop over the higher terrain of the southern great basin Tuesday afternoon.

Cal EOC Incident – 2014 Drought

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

**** As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.****

Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
